

## Camp@Home - Activities

This activity idea was originally part of a Durham Scouts [Camp@Home](#) event. It has been adapted for broader use as part of the Scouting from Home programme

Activities at home should always be risk assessed and supervised by parents/carers, taking note of the specific safety advice provided

## Flameless Campfire

If you can't have an outdoor campfire (or even if you can, but you don't like the cold), why not make a safe, flameless indoor campfire that you can use for indoor camps?

You'll need a collection of plastic containers or water bottles and a head torch. Ideally these will be different colours to create the best effect, or you can colour the outside of the containers with coloured markers, or fill them with water and add some red or yellow food colouring (be careful – food colouring can stain!).

You'll also need a source of light such as head torch or other small torch or a small lamp (**do not use candles or older incandescent light bulbs as these may get too hot and create a fire risk**).

You could even use the torch on your phone. If you have more than one light and set them to flash that would be great!

So that you can get some ideas, check out the Boy Scouts of America (BSA) [Flameless Campfire video](#) on YouTube.
